PRESS RELEASE

76% of French are for France's commitment in the nuclear weapons' elimination process

(IFOP Survey – Le Mouvement de la Paix / La Croix / Planète Paix)

France must ratify the Nuclear Weapon Ban Treaty

For the 50th anniversary of the NPT¹ and the first anniversary of the Nuclear Weapon Ban Treaty², Le Mouvement de la Paix commissioned to the IFOP a poll based on "French, military spending and elimination of nuclear weapons" in collaboration with French newspapers La Croix and Planète Paix. This study was conducted from June 22 to 25, 2018, based on a sample of 1001 people over 18 years, using the quota method. Such report had already been conducted in 2012 by the same institute for the pacifistic organization.

GROSS RESULTS

The IFOP evaluated several suggestions about France's strategies and policies. It appears clearly that French people are in favor for a security policy within the UN, in particular concerning the elimination of nuclear weapons. **Thus, 76% of French approve that "France must make a commitment in an international process of a total and controlled elimination of nuclear weapons, as planned by the UN".** This figure remains at a high level, close to a similar question realized in 2012. That will is really strong on the whole political spectrum.

On the specific question "In your personal opinion, do you think that France have to make a commitment into that process, that means signing and ratifying the Nuclear Weapon Ban Treaty", 67% of French respond favorably, namely two-thirds of the population. The question stated in a transparent manner the environment and position adopted by France. There again, that ambition is predominant in the whole political spectrum and distribution is quite homogenous in every populations sphere.

The first question concerns public spending, results show that the "defense and army" budget, with 18%, would be the second budget expense that should be reduced. The security environment in which citizens

¹The Non-Proliferation Treaty adopted in 1968 July the 1st, coming into effect in 1970, July the 1st.

²Nuclear Weapon Ban Treaty adopted in 2017, July 7th.

have been exposed since the 2015 attacks may explain those reduced results compared to previous studies.

ANALYSIS

At a national level, those figures confirm the evolutions observed at a global level in favor for the elimination of nuclear weapons. For *Le Mouvement de la Paix*: “those data reinforce the groundswell dynamics for the elimination of nuclear weapons, illegal under international law, dangerous because of its threat to the very existence of mankind, militarily ineffective and useless to ensure the nation’s security, costly and morally unacceptable.

This huge gathering is constituted by the ¾ of worldwide states including the Vatican, the UN, the international Red Cross, unions, countless NGOs networks which involve the network of Mayors for peace, the network of doctors for the prevention of nuclear wars (Nobel Prize for Peace), the international network for the banning of nuclear weapons-ICAN³ (Nobel Peace Prize winner 2017).

For *Le Mouvement de la Paix*, that survey is confirmation that citizens are largely demanding in international ban and elimination of nuclear weapons process. This is in contradiction with the maintained statement of a lack of knowledge and disinterest from the public opinion on those matters. “*This opinion survey contradicts the choices made by the government and parliament, which just approved, without any public debate, a new military program Act aiming for a renewal of French nuclear armory, in total contradiction with the international law which outlaws the holding, manufacturing and the threatened use of nuclear weapons*”.

CAMPAIGN

Le Mouvement de la Paix has engaged a campaign urging France to commit itself, to sign and ratify the Nuclear Weapon Ban Treaty. A petition has already started to collect several thousand signatures. The movie “*La Bombe et Nous*⁴” is running today in many movie theaters in collaboration with *Le Mouvement de la Paix* and other organizations members of ICAN-France. The Movement will address through the initiatives around the International Day of Peace (September 21) and during the Marches for Peace organized everywhere in France this year on Saturday September 22th, in association with the national collective “*En Marche pour la Paix*” involving 153 organizations.

On Sunday October 14th 2018, numerous partners are organizing with *Le Mouvement de la Paix* **a day of mobilization at “crime scenes”**. *Le Mouvement de la Paix* insists: “*we want to call the President of the Republic to tell him: Mr. President, get the bomb out of your skull*”. Pacifists will come together towards locations where the French State is preparing the nuclear war to criticize the humanitarian consequences and the illegality of nuclear weapons. “*It has now been confirmed, we are the majority; Mr. President you must listen to this will and engage France into the ratification of the Nuclear Weapon Ban Treaty*”.
