

The Mouvement de la Paix calls for a strong time of mobilizations everywhere in France between March 31 and April 4, 2022, with a special focus on Saturday April 2

Together, let us reaffirm our rejection of war and our condemnation without appeal of Russia's military aggression against Ukraine. "Cursed be all past and present wars!

War is never a solution and is a dead end in Ukraine and elsewhere!

A global mobilisation of the forces of peace is needed to avoid the worst and to obtain a negotiated solution to the conflict.

The Peace Movement

- Reaffirms its condemnation of Russia's military aggression against Ukraine.
- Calls for an immediate ceasefire without preconditions and the withdrawal of Russian troops
- Reaffirms its solidarity with the Ukrainian people and calls for the implementation of a humanitarian solidarity with the Ukrainian people and all the peoples who are victims of wars today (Yemen, Palestine, Sudan and "Africa", Syria, Libya, Burma ...).
- Calls for support for the activities of charitable organisations (Secours Populaire, Secours Catholique, International Red Cross) as well as the UNHCR...
- Supports the actors of peace in Russia who oppose this war.

But this is no longer enough!

We demand that France and all the world's leaders unite their efforts to obtain an immediate ceasefire and to put in place the elements of a negotiated solution, the only way to avoid a spiral with predictable but unbearable consequences for all peoples. The peoples must not bear the consequences of war once again and the use, whether deliberate or by mistake, of weapons of mass destruction must be avoided, in particular nuclear weapons whose miniaturisation makes them more dangerous and more likely to be used.

We re-launch at the global level the call to massively sign the international appeal "Cursed be the war" translated into many languages, and launched in 2018 one hundred years after the end of the first world war by nearly 8,000 citizens from forty countries around the world:

The Peace Movement calls for an insurrection of conscience of all citizens, of all representative organisations; trade unions, political, associative, charitable, humanist etc. with whom we share a common rejection of all wars. It calls on them to unite to organise a strong time of mobilisation at the national level everywhere in France between 31 March and 4 April 2022, giving priority to Saturday 2 April. It is urgent in view of the seriousness of the situation, to avoid the worst, but also to face the challenges of the current world (global warming and social crisis more and more generalized and aggravated by the war in Ukraine).

The Peace Movement is making the widest possible contacts at the international level to achieve a global day of action as soon as possible.

Realism means reaffirming everywhere in France and in the world that humanity has no other way, for a more human future, than Peace and the emergence of a Culture of Peace in the respect of the United Nations Charter.

In Paris, 24 March 2022
